

17 July 1972

MEMORANDUM FOR: Chief, Planning Staff, OL

ATTENTION

:

[REDACTED]

25X1A

SUBJECT

: Agency Annual Report

PSD

1. Per our telephone conversation on 17 July 1972, following are suggestions for items to appear in the Office of Logistics' contribution to subject report:

a. Section I D - Publicity attending production of the unclassified "People's Republic of China Atlas" in December 1971 as a background document for the President's meetings in Peking resulted in our release of the document to the Government Printing Office for printing and sale to the public through the Superintendent of Documents. This is the first time an Agency document has been so released. Based on this precedent, arrangements subsequently were made also to release for sale all unclassified General Survey Maps from the National Intelligence Survey publications.

b. Section III A - The authorized strength of Printing Services Division was reduced by 15 positions, primarily as a direct result of a reduction in the National Intelligence Survey publications production program. This staffing reduction should not affect adversely the ability of the division to meet continuing requirements for service.

2. If further information is desired in connection with the above, please advise.
